

## Metallic Finish with Stencil

- Step 1** Apply eggshell/low sheen acrylic paint. Allow to dry.
- Step 2** Mix 4 parts *Extender for Rolling* to 1 part *Statuary Bronze* and stir well. Roll out mixture in a 3'x3' area using a ¼" nap roller.
- Step 4** While wet, take a dampened *Natural Sea Sponge Mini Roller* and roll over the same surface thus removing some of the metallic finish creating a textured look. Continue this process for entire area. Allow to dry.
- Step 5** Place the *Barcelona stencil* in desired area and mark with a piece of masking tape. Lightly spray back of stencil with stencil adhesive and place in desired location and mask off edges with tape.
- Step 6** Roll a coat of *Bronze Reactive Metallic Paint* over the stencil and let dry for ½ hour. Apply a second coat and while the paint is wet, apply *Blue Patina Activator* over the surface. It may be necessary to stipple the surface to prevent drips. Allow to dry.
- Step 7** Once dry, carefully remove stencil and place in next desired location.

### Products & Tools

- Eggshell/low sheen acrylic paint
- **Metallic Paint Collection™** *Statuary Bronze* metallic paint and *Extender for Rolling*
- **Metal Effects®** *Bronze Reactive* metallic paint and *Blue Patina*
